EXPERIENCE

Business Navigator - Operations | IKEA

NOV 2016 - DEC 2019, COQUITLAM, BC

- Identified business opportunities for growth and helped implement a new concept, which led to a 5% annual sales increase for IKEA Food and has garnered attention amongst other IKEAs around the world
- Managed operational budgets and monitored productivity, which led to consistent annual gross profit growth of 0.5% - 1% while maintaining a top 3 position in productivity benchmarks across 13 stores in Canada for 3 years in a row
- Led a team of 4 individuals, with clear goals and responsibilities to ensure good cross functional communication throughout the organization
- Developed several tools and reports to efficiently gather and share information with stakeholders, decreasing administrative tasks and providing a more effective use of staff costs

Full-Serve Logistics Worker | IKEA

JUN 2015 - NOV 2016, COQUITLAM, BC

- Analyzed weekly logistics benchmark reports and identified opportunities to increase productivity
- Refined working methods to improve customer experience during our customer fulfillment transformation

After Sales Worker | IKEA

JUL 2010 - JUN 2015, COQUITLAM, BC

- Partnered with external service providers to ensure the best customer experience possible
- Advised customers of our service offerings and the benefits of our products with my extensive product knowledge

Excel, SQL, Python, R

PROFILE

Growth-oriented individual with an entrepreneurial mind-set. I have over 10 years of retail experience with the last 3 years in business development. I have a passion for business and sports and was drawn to the fact that I can apply data science techniques to both of my passions. Whether it's analysing business data to identify trends, or building a tool to win my fantasy football league, the possibilities are truly endless.

Gino Sacco

Business Navigator at IKEA, BBA, Capilano University

The truth is, data science has played a major part in my career up to this point. Whether it's been for research, or identifying business problems, I've never had a shortage of questions that have needed answers. Deciding to invest in myself, and learn new skills here at BrainStation, I have been able to attain the technical skills which will help me attain answers to my many questions.

Predicting NFL Play-Calling

Using machine learning to predict whether an upcoming NFL play will be a pass or a run.
